Wizard Screens offers our customers custom made screen windows and doors for your home

WHY CHOOSE WIZARD SCREENS & MORE VICTORIA:

We are the preferred manufacturer of the widest range of window and door screens in Victoria, with referrals from local, BC and other window and door manufacturers and many local glass companies.

There is no job, too small or too large for our experienced and capable staff to take on, whether new construction, custom or older homes and buildings even if they have never benefitted from screens. We have the expertise, components, clips and connectors to ensure a custom and best possible screening. We believe your screens should fit properly and be easily removable for cleaning. Also we manufacture with the finest quality aluminum bar, purchased in volume at competitive pricing, sourced from our parent company, Wizard Industries in Burnaby BC. We use only this double thickness extruded bar, so your screens will be robust and withstand even frequent removal and reinstallation for cleaning, where doing so will also be quick and easy due to our well designed clipping and mounting systems.

Please do note that while it may seem simple to make a screen to fit into a window opening, what works best does vary with what are a wide range of window types here on Vancouver Island. Our Wizard screens are made to exacting measurements, where all four corners must be square to allow for the mesh to be tensioned properly, and accommodate either tension springs, metal clip mounting systems or butterfly clips for fastening to your windows. Being of a heavier weight aluminum bar means they lay flat on your window screen channels, thus minimizing bowing experienced with larger screens. Our more rigid screen frames mean measurements must be precise, as our screens cannot be flexed or jammed into the channels of your windows meant for screens (Note doing so damages your screens).

Our vast experiences in making screens confirm some windows, whether new or old and the channels to allow screens may not be built or installed so as to be plumb, square or level, thus rendering it impossible to build screens that fit perfectly. Please respect we do the best we can to measure and build to accommodate these imperfections, and in doing so compromises in the way of requiring looser or tighter fitments will occur. Sometimes where a window corner is misaligned we can adjust for this.

MINIMUM ORDERS:

- With orders of \$160 or more before taxes (approximately 4 standard window screens), or \$225 if wicket screens, within a 15 km radius of our store, we will have a member of our team come to your home in Greater Victoria to measure in a manner to optimize proper sizing , fitting and fastening of your custom screen order.
- It is best you the homeowner or user of the screens is present at both measuring and installation, or become educated at our shop and showroom in how these will be installed. For standard or non wicket screens, we ask you to pick up your orders for your own checking for size and initial fitting. We find then adjustments required are accommodated quickly, where we will attend to your home a second time only as required. We do need to come out a second time when wicket screens are involved due to their fastening requirements (included in our pricing).
- Customers wishing a second visit for fitting of standard, non-wicket screens are charged an additional and nominal \$50 for this service for each trip, unless adjustments required are from our errors in measuring or fabricating.
- Even single screens will be fabricated for you, to your specifications and dimensions, on a cash and carry basis, with a 50% cash preferred deposit required before we custom build your order.
- If you bring in your damaged existing screens to our showroom, we can ensure a better, premium replacement, which will include more robust framing of extruded double thick bar, usually more durable than what you are replacing and as well, we can supply new clips or fasteners from our well stocked hardware and parts inventory.

Before any custom manufacturing of larger orders, a deposit is required equalling half your total screen cost (before clips or fasteners), before we start fabrication of your screens.

Our average time between order and install or ready for pick up is 2 weeks during the summer

PRICES: (maximum 3' x 4', taxes not included):

- \$40 Standard window screen (Minimum 4)
- \$45 Window screen with 1 wicket (Minimum 3)
- \$60 Window screen with 2 wickets (Minimum 3)
- \$199 Heavy duty patio sliding patio screen, (with Wizard steel framed wheels, up to 37" W by 84" H)
- \$399 Premium Standard Retractable single door or patio screen (up to 40" W to 84" H)
- \$789 premium Retractable French door patio screen (with lock pins for 1 side, and mohair to prevent small gaps, up to 80" W by 84" H)
- Pet mesh and solar mesh available at a premium of \$1.50 per square foot, for windows and patio door screens
- Custom screen work (e.g. for skylights) is minimum \$75 for a site visit, and \$50 per hour to design, plan and manufacture, plus cost of components
- We even offer loaner clips to help our customers identify clips needed for their window frames:
- \$10 for the 10 plastic clip options; \$6 for the 6 metal clips used in older aluminum windows

CONDITIONS:

- Please note our presumption is that windows we are building screens for are square, plumb and level.
- Should your windows prove not to be when placing in your new screens, it is possible the fitting will not be precise. In these cases then further adjustments required to custom fit, due to window irregularities may be required. This will at our nominal service call or shop charges, to cover our costs.
- We do require your understanding and sign-off on these realities before we contract with you to build your custom made Wizard screens.

As has always been our policy, advice and recommendations to assist with your measuring, either over the phone or especially via email (send us pictures of your screen challenges) are always welcome.

We hope this leaves you well screened to partner with us on your screen project.

Sincerely, The Wizard team in Victoria, July 2015
