Wizard Screens offers our customers custom made Retractable (RetractaView and VistaView), Security (SecuraView) screens, an Heavy Duty Patio sliding screens with exclusive Wizard wheels

Also we offer a full range of our door awnings (PolyAwns), as well as awnings, motorized screens and specialty outdoor covers and shades, and steel security products from various manufacturers for which we are exclusive dealers locally.

OUR CUSTOMERS:

We are the preferred supplier of screen products in Victoria, with referrals from local, BC and other window and door manufacturers and many local glass companies.

There is no job, too small or too large for our experienced and capable staff to take on, whether new construction, custom or older homes and buildings even if they have never benefitted from our retractable or security screens. We have the expertise, locally available components, screen mesh options , sill adaptors, and accessories to ensure a custom and best possible screening experience.

PROUCT MATERIALS AND QUALITY :

We believe your screens should last the lifetime of your doors and windows, and fit precisely. We stock mohair and rubber flap materials to ensure custom fitting and stopping insects from entering through cracks and crevices.

We manufacture our products with the finest quality aluminum, steel, and plastic purchased in volume at competitive pricing, sourced from our parent company, Wizard Industries in Burnaby BC. Retractable screen mesh materials are sourced from the world leader in screen materials: Phifer Incorporated. Our security screens are a patented marine grade interwoven stainless steel mesh unique to our Wizard SecuraView products

Our Wizard screen products are made to exacting measurements, and presume your openings are square, plumb and level. Frames and cassettes are extruded, robust, stiff aluminum bar which lay flat on openings.

INSTALLATION, LOCAL SERVICE AND SUPPORT INCLUDED:

We market virtually all of our products as installed on your premises as we offer industry leading warranties on our products. We service all the products we sell, with locally stocked parts right here in Victoria.

Note our RetractaView Screens are fabricated from Wizard components right here in Victoria, where we serve our network of dealers and Installers throughout Vancouver Island and the Gulf Islands. We are the only retractable screen manufacturer doing this locally to ensure each screen is made precisely and will last as long as your door or

window system. SecuraView and VistaView screens are custom made for each application at our Burnaby plant where we have a specialized machine to clinch, clamp and screw each mesh to the aluminum framing.

ESTIMATES, PROCESS:

With RetractaView sales and installations, we can often provide an estimated cost once we understand what is your door or window application.

For VistaView and SecuraView products we will come to your premises to precise measure and provide a firm quote, after you indicate a willingness to proceed once providing you with the initial verbal or email estimated cost for your application.

PRICING AND OTHER CHARGES:

Before any custom manufacturing of your RetractaView, VistaView or SecuraView product, a deposit is required equalling half (50%) your total quote.

Our installed prices quoted include one 40" sill adapter for single doors, and 80" for French door RetractaView applications.

Please note additional sill adaptors, time and materials to custom fit our products on your non-standard openings will be at an additional cost, where our Installers are experts at making our Wizard products custom fit and where possible, seem to disappear and appear seamless with your entryways or windows.

Additional work required and the extra charges applied may not be appreciated during our initial estimate, especially if at a Home Show or verbally over the phone. However these will be determined and discussed with you for your approval as we provide a final quote before taking your deposit for your order.

We do require your understanding and sign-off on these realities before we contract with you to build your custom made Wizard RetractaView, VistaView and SecurView screens.

We are happy to provide our advice, experience and recommendations to assist with your rough measuring, either over the phone or especially via email (send us pictures of your screen challenges), so we can provide you will accurate initial pricing and estimates.

We hope this leaves you well screened and covered to partner with us on your screen project.

Sincerely, from the Wizard Screens & More Team in Victoria:

Raymond Mew: Owner

James Clarke: Manager
